We, the named San Mateo County Residents below, request the Zoning Hearing Officer approve the Use Permit (PLN2001-00695), as scheduled to be presented before her on September 6, 2018, for Redwood Glen Camp and Conference Center; in consideration of the following facts:

- We believe Redwood Glen has been a vital member of the San Mateo County community for generations through:
    - being a place for kids and adults alike to learn environmental awareness and stewardship),
    - the development of community leaders (pastors, spiritual leaders, community organizers, biologists and naturalists, and many more)
    - providing stable housing and income to members of the South Coast area – an area that has historically/typically been income-challenged
- Redwood Glen has taken all precautions in design of its change of water source and associated treatment equipment to ensure the health and preservation of the environment through:
    - Only making the change because it was necessary and unavoidable
    - By returning to sources that already serviced Redwood Glen for over 40 years
    - By incorporating treatment processes and technologies that minimize water use
- And approval of this project is essential to Redwood Glen's existence and continued ability to service the South Coast area, affecting dozens of people through housing and employment; the San Mateo County community, affecting thousands of San Mateo residents through environmental stewardship and developing community leaders; and beyond through providing a place for thousands annually to become more environmentally aware and a place for the next generation of environmental leaders worldwide to develop.
